

CM5 Countertop Coffee System

Simply perfect coffee... every time.

Intuitive text display

Integrated cup warmer

Stainless steel milk flask

Perfect coffee preparation

Miele created the first built-in coffee system ten years ago with a revolutionary concept... perfect coffee, whatever your preference, at the simple touch of a button.

In 2011, Miele will introduce the CM5 Coffee System, bringing its legendary design and quality to the countertop category. Incorporating proven technology developed for its built-in coffee systems, two models will be available – both designed for use with whole coffee beans. Color options are white and black. The hallmarks of all Miele products are superior performance, simplicity of use, exceptional longevity and design that is both understated and elegant. The new CM5 series proudly embodies all these characteristics.

CM5 Countertop Coffee System

Simply perfect coffee... every time.
