Luminaire Innov-is XP1

An Enlightened Sewing, Embroidery and Quilting Experience That is Light Years Ahead

With technology that borders on magic, the arrival of the Luminaire Innov-is XP1 redefines excellence in the sewing and embroidery world. Featuring state-of-the-art StitchVision Technology, the Luminaire brilliantly empowers your creativity through the innovative use of beaming light. Experience true luxury with our largest workspace and largest embroidery area ever offered, coupled with a revolutionary collection of capabilities to help you achieve perfection in every stitch.

Revolutionary StitchVision Technology

- Clearly preview stitches and embroidery designs directly on your fabric with this intelligent projection system. This widely utilized projection technology grants you the capability to preview, audition and edit your designs and stitches in a 5" x 3" virtual preview area.

Guideline and grid markers

- Use the StitchVision Technology to project a guideline marker line and a guideline marker grid on your fabric, offering you the option of single, double, angled, or grid lines to light your path with precision. This technology projects a full grid of bright and adjustable guidelines for use when creating multiple rows of stitches, parallel stitching, pin tucks, hems, curtain rod pockets, decorative stitches, cross hatch quilting, or smocking.

Large 10 5/8" x 16" embroidery area

- Largest and most advanced embroidery frame that Brother has ever offered. Create larger-than-life embroidery with ease. Frame includes rubber plates on both sides for a superior grip on fabric, while an ergonomic spring lever release enables easier, clamp-free hooping. Additional frames include 4" x 4", 5" x 7" and 9.5" x 9.5" sizes.

65 square inches of workspace - 13.1" needle to arm

- Handle virtually any project with ease on 65 square inches of workspace. A generous needle to arm distance of 13.1" is our largest ever, providing the capability to fully accommodate a rolled king-sized quilt!

Built-in embroidery pointer

- Displaying a 'T' mark in three different colors, the pointer can show the center of your embroidery design as well as the needle drop position on the fabric.

Large 10.1" built-in high-definition LCD display with capacitive technology

- View your creations in crisp, vivid color and navigate easily with the scrolling menu and large, intuitive icons. 16.7+ million possible colors and an adjustment feature that allows you to change the brightness of the screen. The intuitive touch screen works like a tablet with familiar sliding, swiping, scrolling, and pinch-to-zoom for viewing detailed steps, categories, and designs.

One action needle plate

- Allows for needle plate changes without the use of a screwdriver, saving you time and effort for a seamless sewing experience.

Echo quilting

- Surround any embroidery with beautiful echo stitches. The echo designs follow the contour of the original embroidery and expand outwards, with adjustable spacing to help you customize your designs down to the last detail.

Expandable library of built-in tutorials

- View over 30 enhanced tutorial videos directly on the high-definition LCD display (version 1.2) - with everything from basic operations to embroidery functions. The included HD tutorials make learning easy!

Basic Features

LCD Display Size (Diagonal)	
LCD Size (Horizontal x Vertical) Inches	10.1" Capacitive (5.3 x 8.5)
Display (Number of Colors)	Up to 16,777,216
Stitch Select	Slide Scrolling, Pinch In/Out
On-Screen Help	•
One Action Needle Plate	•
Projector	
(Display Size/Brightness/Resolution/Type)	5" x 3" / 40 lm / WVGA / TI DLP® Technology
Built-in Languages	12 Languages
